

**1. The thickness of the Mosquito Net**

Check the width between the window frame and the mosquito net.

The fastest and simplest way of measuring it is by placing a 5 cents coin to verify if you have the minimum space necessary for the mosquito net.

**2. Measure the height**

It's important to provide us the exact measurement from the top window frame to the bottom.

Only measure the inside part of the window frame.

**3. Measure the width**

To measure the width for the mosquito net, measure the width of one of the window cases.
